P-SERIES PREMIUM GRILLS

The P3X and P4X grills represent the best all-around gas grill you can buy. The thick cast aluminum head maintains a consistent temperature at any setting – whether you’re slow roasting, indirect cooking, or searing steaks. The P3X and P4X are as versatile as they are durable.

P Series grills feature the legendary 40,000 Btu Bowtie Burner for exceptional heat distribution at any temperature setting. The P3X offers over 695 square inches of total cooking area – including the cooking grids and warming rack. The P4X has 473 square inches. Both offer two-piece multi-level cooking grids – so you can vary the flame and vary the grid height for better cooking control.

Everything from the burner to the grids to the warming rack is stainless steel.

Both grills are available with CharMaster™ Briquets (P3X and P4X) or Flare Buster Ceramic Flavor Enhancers (P3XF and P4XF models).

Add the optional Smoker Shutter to any P3X grill to double its versatility.

Available in Natural Gas or LP. Conversion Kits optional.

H-SERIES DELUXE GRILLS

H3X and H4X grills feature the legendary Broilmaster cast aluminum grill head outfitted with a two-piece set of single-level stainless steel cooking grids, stainless steel H-style burner with separate left/right control, and chrome-plated steel warming rack.

The H-Series delivers much of the versatility Broilmaster are famous for, but at a more accessible price.

Available in Natural Gas or LP. Conversion Kits optional.

Q-SERIES SLOW COOKING GRILLS

Achieving traditional barbecue flavor demands a low temperature, lots of moisture, and a long cooking time. Broilmaster's Grave Grill delivers the goods – and more.

Unlike cookers made with a stamped steel shell, the Grave Grill's thick aluminum casting maintains a consistent cooking temperature all day – and all night. So when your grandfather's secret pork shoulder recipe calls for 200 to 220 degrees for 14 hours, that's precisely what you'll get.

The stainless steel drip pan eliminates flare-ups, so you spend more time entertaining and less time lifting the lid. Drippings fall onto the pan and vaporize to produce flavorful smoke. Excess fat and liquids flow down into the drain channel and out of the grill to the external drip bucket. Fill the drip pan with beer, water or marinade to produce flavorful steam. Add chips to the slide-in chip tray to create mouth-watering smoky flavor on meat and poultry.

Available in Natural Gas or LP. Conversion Kits optional.

R-SERIES INFRARED GAS GRILLS

Designed for serious steak lovers, the R-Series Infrared Grills deliver restaurant-quality searing performance to your backyard or patio.

With its independent burner management and multi-position lid stop, the R3 Infrared Grill provides a broader temperature range (as low as 350 degrees) and control unmatched in other infrared grills. This cooking versatility lets you sear steaks, chicken or chops; indirect cook a roast or turkey; and even bake pizza and cookies.

Special V-Channel cooking grids over the IR burners capture up to 65 percent of the drippings from your food. The R3's burners generate up to 1,600 degrees F at the surface to vaporize those drippings – adding flavor and moisture to your meals. A host of stainless steel components ensure a lifetime of service – cooking grids, Retract-A-Rack, adjustable lid stop, and control panel.

Choose a pure IR model – the R3 – or a unique combination of IR and conventional grilling – the R3B.

Available in Natural Gas or LP. Conversion Kits optional.

C3 SERIES CHARCOAL GRILLS

The secret to cooking with charcoal lies in how well you regulate the flow of air into the grill; and how well you control the heat and smoke as it surrounds your food.

The C3 starts with a large grill head cast in ¼-inch thick aluminum, which heats quickly and evenly, and then helps you maintain a consistent cooking temperature – no matter the weather. Precision machined vents deliver precise air flow at any setting – from barely smoking to intense steak-searing heat. The C3 outperforms ceramic grills both in cooking versatility and in everyday convenience features – such as the two front-loading doors for loading charcoal and removing ash.

This tall grill head, with its adjustable cooking grids, maximizes the available volume to give you the freedom to tackle any size meal – from burgers and brats to a 20-lb turkey with stuffing on the side. Add the automatically retracting warming rack to increase your cooking area – without the hassle of stacked-on raised grids.

And the C3 is the first and only charcoal grill to offer an optional infrared ceramic plate to turn charcoal's heat into true IR energy for searing steaks, seafood and chops.
